

EAGLE IMAGER® 160 TCS

TRUCK CHARGING SYSTEM

The Scott Eagle Imager 160 truck charging system is designed to provide secure, firefighter ready accessibility to your thermal imaging camera. Ready-for-action access is enhanced with full charging capabilities for the camera's on-board and spare batteries. A fully charged battery will provide approximately four hours of service life.

Designed specifically for Scott's Eagle Imager 160 thermal imaging camera, the truck charging system permits user-selectable vertical or horizontal mounting inside a fire apparatus. The unit may also be easily wall-mounted in the station or service room.

The unit securely retains the Eagle Imager 160 with dual mounting fixtures and a durable hand strap.

PRODUCT HIGHLIGHTS

- Easily wall-mounted in the station or service room
- 12-volt DC or 110-volt AC power supply adapter
- Meets NFPA Standard for Automotive Fire Apparatus

FULL CHARGING CAPABILITIES

TRUCK CHARGING SYSTEM

The truck charging system is available with either 12-volt DC or 110-volt AC power supply adapters. The system fully charges depleted batteries and maintains this full charge readiness. Charging circuits charge both the battery attached to the camera and the spare battery, which is secured in a separate threaded charging compartment.

The system's unique dual charging system starts charging the first battery inserted, whether it is the battery attached to the camera or the spare battery. It then automatically switches to charge the second battery when the first has been fully charged. Two on-board LEDs clearly indicate charging status to the user.

The Eagle Imager 160 truck charging system meets the requirements of the NFPA Standard for Automotive Fire Apparatus specified in NFPA 1901, Current Edition, and is capable of retaining a secured thermal imaging camera while withstanding impacts of up to 9-Gs from a longitudinal direction and 3-Gs from other directions.

Ordering Information:

Part Number	Description
200235-01	TCS w/12-volt DC converter
200235-02	TCS w/110-volt AC converter

Truck charging system dimensions: 16.4" (length) X 10" (width) X 4" (depth)
